

The figure displays two side-by-side box plots. The left plot, representing the 'blue' category, has a median line at approximately 10. Its interquartile range (IQR) spans from about 7 to 13. The whiskers extend from roughly 5 to 15. There are several outliers above the upper whisker, with values around 18, 20, 22, and 25. The right plot, representing the 'orange' category, also has a median line at approximately 10. Its IQR spans from about 7 to 13. The whiskers extend from roughly 5 to 15. There are several outliers above the upper whisker, with values around 18, 20, 22, and 25.
